

Jaime Gabriel Hernández García

Computer Systems Engineer

✉ jaimegabrielhernandezgarcia@hotmail.com | ☎ +52 56 3608 4525 | 🌐 GitHub

PROFILE

Soon-to-be Computer Systems Engineer driven by discipline and integrity. During my studies, I have developed strong skills in software engineering, database architecture, and a notable proficiency in designing convolutional neural networks. My path combining work and academic life has forged a strong capacity for organization, resilience, and a practical approach to turning technological theory into tangible results.

EXPERIENCE

CONSECAL S.A. de C.V.

Mar. 2024 – May. 2026

Web Development Lead

Mexico

- Designed and implemented the company's new website, achieving a **45% increase in monthly visits**.
- Developed a results-lookup system that streamlined internal processes, **reducing customer service time by 20%**.
- Managed web server deployments via cPanel and maintained version control of the project's codebase.
- Technologies:** PHP, HTML, CSS, JavaScript, MySQL, cPanel, Git.

Poli Asesor

Jan. 2021 – Jun. 2022

Database Administrator

Mexico

- Led the development of an online tutoring platform, **benefiting more than 500 students**.
- Administered and structured the relational database, implementing indexes and security rules to optimize query performance.
- Deployed cloud backup and monitoring services leveraging Microsoft Azure and AWS infrastructure.
- Technologies:** Java, Python, HTML, CSS, JavaScript, MySQL, Microsoft Azure, AWS.

PROJECTS

SysLocker: Smart Locker System

2026

- Developed the hardware and software architecture and integration using Raspberry Pi for automated relay control via GPIO pins.
- Automated system execution and monitoring scripts in a Linux environment using Bash/Shell.
- Technologies:** Python, Raspberry Pi, Bash/Shell, GPIO, IoT.

Morbus Vita: Predictive Health System

2021

- Designed and optimized the back-end of an interactive web application that calculates the probability of developing chronic diseases based on user habit analysis.
- Implemented machine learning models using the **ID3** classification algorithm for predictive decision-making.
- Technologies:** Python, Java, HTML, CSS, JavaScript, ID3 Algorithm.

EDUCATION

Escuela Superior de Cómputo (ESCOM - IPN)

2022 – 2026

B.S. in Computer Systems Engineering

Mexico City, Mexico

- Areas of focus:** Artificial Intelligence, Advanced Databases, Software Architecture, and Distributed Systems.

Centro de Estudios Científicos y Tecnológicos No. 9 (CECyT 9 - IPN)

2019 – 2022

Technical Degree in Programming

Mexico City, Mexico

- Areas of focus:** Programming, Databases, Documentation, and Good practices.

TECHNICAL SKILLS AND CERTIFICATIONS

Languages & Development : Python, Java, PHP, JavaScript, Node.js, HTML, CSS

AI & Data : Convolutional Neural Networks (CNN), Classification Algorithms (ID3, CART)

Databases & Cloud : Advanced SQL (MySQL, SQL Server, PostgreSQL), Microsoft Azure, AWS

Hardware & Systems : Raspberry Pi Integration, IoT Automation, Linux Environments (Bash/Shell)

Work Methodologies : Agile (Scrum, XP) and Traditional (Waterfall, Spiral)

Languages & Certifications : Spanish (Native), English (C1) | **Huawei HCCDA - Tech Essentials**
